Pet Ownership During the COVID Pandemic

A Report by Animal Medicines Australia

A report from Animal Medicines Australia (AMA) has found that many Australians took the opportunity to introduce a pet into their household during the pandemic. Their survey indicated that there was a *significant increase* in the percent of households taking in a new dog, fish, or bird. Their research also indicated that pets had a number of positive influences on their lives such as:

- companionship
- better mental health
- joy and happiness

With the increase in pet ownership, the AMA is encouraging policymakers to consider the needs of companion animals and their owners when considering rental, strata, and body corporate regulations, as well as accepting animals in public places and transport.

Pet type	Household penetration (%)		Total owner households ('000)		Animals per household (average)		Total pets ('000)
